

Internal EUT Photographs

FCC ID: HVVAD27W

RF boards

A photograph showing the internal components of a portable electronic device, likely a portable power supply or a small computer system. The device is housed in a black plastic enclosure. The internal components include a green printed circuit board (PCB) populated with various electronic components such as integrated circuits, capacitors, and resistors. A yellow component, possibly a transformer or a large capacitor, is visible on the left side of the PCB. Numerous colored wires (red, blue, green, yellow, black) are connected to the PCB and extend out of the enclosure. A black cable is plugged into a port on the bottom left. The top of the enclosure is open, revealing the internal wiring and components.
