Declaration of Compliance to RF Exposure Limits for Humans

The 13BBL receiver complies with the RF exposure limits for humans as called out in RSS-102. The receiver is used in a vehicle remote keyless entry system. It is exempt from RF evaluation based on its operating frequency of 314.35 MHz, and output power below the noise level of our receiver. This would be less than the 1.5 watt requirement for a mobile device.

A handwritten signature in black ink, reading "Joel T. Schneider". The signature is written in a cursive, flowing style.
