

3. Outline of the system

3.1. Description of the product operation

This product is mainly used for reading bar codes and transmitting data of the bar codes to a host computer.

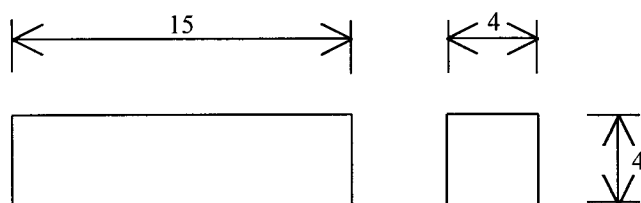

BHT-7500S send a radio wave signal while the data is transmitted.

9. Description of antenna

9.1. Electrical description

- Input impedance : 50 ohm (Nominal)
- Frequency band : 2400 MHz to 2497 MHz
- Gain : Over -6dBd
- Maximum allowance electrical power : Less than 1 W

9.2. Appearance of antenna

Unit : mm
