

The difference between the approved model and variant is as follow:

- 1.To micro-change the antenna matching circuit (Please see the uploaded "Antenna Circuit regarding modification" )
- 2.To upgrade the defect of the identical module IC of Bluetooth module (UGTZ5-551A to UGTZ5-551B)

In accordance with the above changes, there is a bit change of Circuit Diagram and Block diagram. Please see the uploaded Schematics and Block diagram.

(There is no change on Antenna, fundamental frequency and Output power as I informed you before. )

Thank you for your cooperation.

Best regards,

Yukie Koyama
