Hi Chris,

I just got revised file, hope this time client addressed your question.

Thanks,

Claire Hoque

Dear Thu Chan and Claire Hoque,

You are listed as the Technical Contacts for the above referenced TCB application. The following items still need to be resolved before the review can be continued:

1. The new exhibit for Regulatory Compliance information to the installers states that a minimum separation distance of 100cm is required, however the test reports document separation distances between 20 cm and 380 cm depending on the antennas selected and the simultaneous transmission operation. Please revise the installation documentation to provide clear guidance to the professional installers about the correct separation distance determination depending on the configuration.

The following note will be placed on the Grant:

"The antennas require professional installation and must be fixed-mounted on indoor/outdoor permanent structures with a separation distance from all persons as documented in the filing (between 20 cm and 380 cm depending on antenna and mode)."

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
