Request for Modular Approval for

FCC ID: I28-WYSBHVDXP

Item	Requirements	EUT
1.	The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	The module is equipped with its own shielding case.
2.	The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	The module has buffer modulation / data inputs.
3.	The module must contain power supply regulation on the module	The module has its own power supply regulation.
4.	The module must contain a permanently attached antenna, or contain a unique antenna connector, 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	The module is SIP module with BGA, with the antenna gain WLAN: Patch Gain: 3.81 dBi (2.4G); 4.4 dBi (5G) Omnidirectional Gain 3.0 dBi (2.4G); 5.0 dBi(5G) Bluetooth: Monopole: 3 dBi (2.4G)
5.	The module must demonstrate compliance in a stand-alone configuration	The module was tested on evaluation board, and it's not inside of another device during testing
6.	The module must be labeled with its permanently affixed FCC ID label, or use an electronic display	The module transmitter will be labeled with its own FCC ID, and for OEM integration the integration manual contains labeling instructions for the host device per Part 15.212 (vi)

ZEBRA

Regulatory Engineering

7.	The module must comply with all	The module approved transmitter complies with
	specific rules applicable to the	all applicable rules and the integration manual
	transmitter, including all the	contains any specific requirements addressed to
	conditions provided in the integration	the integrator and/or to the end-user of the final
	instructions by the grantee	end-product.
8.	The module must comply with RF	The module complies with the FCC RF exposure
	exposure requirements	requirements for fixed and mobile applications.
		RF exposure is addressed in the RF exposure
		exhibit.
