SUBJECT: Zebra Technologies Corporation
FCC ID: I2821224121
731 Confirmation No.: TC803828
Correspondence Reference No.: 5366
Request for Tech. Info.: 10/05/02

Dear Tim:

Transmitted herewith, on behalf of **Zebra Technologies Corporation** is an amendment provided in response to the request for technical information dated October 5, 2002.

1. The BEDG and end cap antennas were used in this filing.
2. PCTEST has no explanation for the E-field probe PCT25 variation in conversion factors. Probe PCT25 is the only probe calibrated by Aprel/ NCL Lab for PCTEST in the 2.45 GHz band. PCTEST no longer uses this E-field Probe PCT25 for tests.
3. Please find the updated SAR report with test setup photos on report data table pages with amended Figure 14.6 caption, indicating Body SAR.

We trust this information is sufficient to resolve FCC questions in this application. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
President
