RE: Zebra Technologies

FCC ID: I28MD-BTC2TY

I have a few comments on the above referenced Application.

- 1) The conducted measurements provided in the test report appear to have been tested to the new limits as given in the results and procedure. However, part of the procedure mentions the use of a 400 kHz high pass filter. This would affect any results falling between 150 kHz and 450 kHz. Please comment and/or provide new test data as necessary.

Timothy R. Johnson  
Examining Engineer
