

Setup and Test Configuration Consideration

Radio & Antenna Location

Antenna Location

Remark:

SAR is not required because the distance from the antenna to the edge is > 25 mm as per KDB 941225 D06 Hotspot Mode SAR. So Top side and bottom side are not required.

EUT Test Position for SAR

Test Position-1 (Left Side with 0mm distance)

Test Position-2 (Bottom Side with 0mm distance)

Note: Test Position 1 and 2 were tested at 0mm distance to consider worse case as a normal usage.
