AN07T6977, Notice#1

Question #1: Please submit "Answers to FCC questions". It is required to be included in the filing.

Ans : Please see the attachment.

Question #2: Please explain why the fundamental field strength limit is 67.9 dBuV/m instead of 48 dBuV/m.

Ans : I had revise page 20 to 22 of test report, Please see the attachment.

Question #3: The user manual (page 42 of 45) indicates "FM transmitter - Built-in cradle, 12 selectable frequencies", but the same manual lists only 10 frequencies: 88.3 MHz, ... 107.7MHz. Please correct the discrepancy.

Ans : I had revise page 42 of user manual, Please see the attachment.

Best Regards,  
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
