2/28/2003

Dear Examiner:

I am writing to this letter to advise you that the end user dictates the filter or other device given enough margin to accommodate the typical loss between REMEC's model DPA4040G amplifier and the other unit which controlled by the end user, and there is no different than running with lower output.

Thank you for your attention. Please let the undersigned know if the Commission disagrees with our position or requires further justification.

Sincerely,

A handwritten signature in black ink that reads "Mandel H Berenberg". The signature is written in a cursive style with a large, looped 'g' at the end.

Mandel Berenberg,  
Sr. Quality Manager
