

POINTBLANK PROJECTOR RADIO

InFocus © 2008

A detailed view of the green printed circuit board (PCB) showing various electronic components. The board is populated with a central silver rectangular component, likely a microcontroller or processor, and a large black square component, possibly a power MOSFET. Other components include several small surface-mount capacitors (labeled C11, C12, C13, C15), resistors (R1, R2, R3, R4), and a connector (J1). The board also features four large circular mounting holes with orange-colored rings. The text "POINTBLANK PROJECTOR RADIO" and "InFocus © 2008" are printed on the board. The logo "Pb" is also visible.
