

Date: 07Oct15

Subject: Attestation of Compliance with 90.203(e)

To whom it may concern:

This letter provides IMT's attestation to compliance with 90.203(e) for the application for certification of FCC-ID 25VST-AMP. This letter responds to item 9 as received in comments from the TCB, dated 25Sep15, and known as JOB #: 1804UC15.

IMT attests that there are no physical user controls that might enable a user to modify the transmitter frequency programming of the 25VST-AMP by accessing the transmitter installation.

IMT further attests that availability of frequency programming software will be limited to personnel servicing and maintaining the 25VST-AMP.

IMT believes that these two conditions represent compliance with 90.203(e).

Sincerely,

Stephen D. Kitko
