FCC ID: I4U-25VST-AMP
Product name: Very Small Transmitter
Product base model: 25VST-AMP

PROPRIETARY INFORMATION

This document contains proprietary information, which shall not be reproduced or transferred to other documents or disclosed to others or used for manufacturing or any other purpose without prior written permission of Integrated Microwave Technologies LLC.

Revision Control Cover Sheet				
Revision	Date	Section or paragraph affected	Page(s)	Change Description
1.0	8/03/2015	all	all	Initial Draft

1 User's Tune Up Procedures

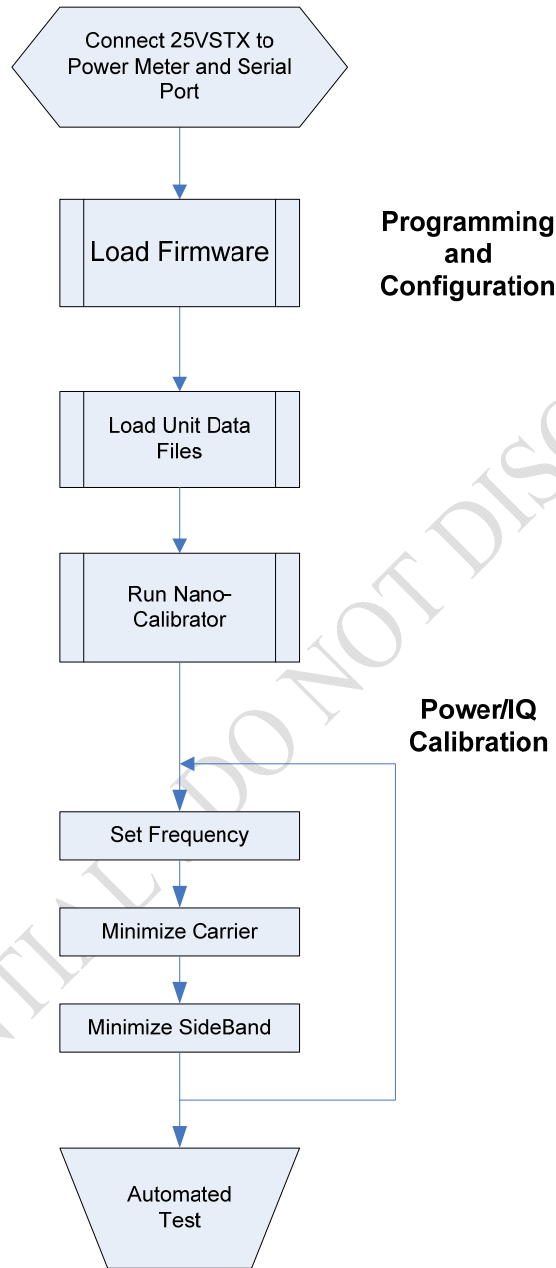

There is no tune up procedure needed by the end user. All RF power settings are done by manufacture.

2 Manufacture's Tune Up Procedures

25VST-AMP requires no tuning by design. Each transmitter is extensively tested at time of manufacture. The maximum RF output power is measured and checked against the specification. Only those EUTs with the correct values will pass.

The flow chart on the next page depicts the calibration procedure.
