- Close the Battery Door and screw if tight

FCC ID: 15413-002-00-01

Operation

The product is operated in pair as below with one party talking (transmitting signal) and the other party listening (receiving signal)

Talking (Transmission)

- pull out the Antenna until it is 90 degree to the body
- push the Volume Switch from off position to low position
- push the Talk Button inward and hold it while talking toward the Speaker at a distance of 10cm from the Speaker

Listening (Receiving)

- make sure Antenna is pull out and Volume Switch is push to either low or high position
- user will hear the transmitting party's voice (make sure the Talk Button is not push and hold)

Note:

- Be careful not to touch the Antenna while using the walkie talkie as it will affect signal receiving
- 2. Adjust the Volume Switch to high position in case voice is small
- 3. User can put the walkie talkie on their wrist with the Wrist Belt
