Dear Bill,

Thanks for your kindly advise.

As per your review comments, please see the explanation below:

- 1) In the beginning we executed the EMC test with desktop PC.
After testing, we found the output power is over the SAR limit and SAR test is needed. Thus we performed the SAR test with the Notebook PC as one of the testing peripheral.
After compared the output power with desktop PC and Notebook PC, the value is very close.
- 2) Sorry to confused you!!! I'm not know the rule of DofC very well.
This project is applied for DofC approval, and the FCC Info as file attached for your reference.
- 3) Thanks for your advise. We'll improve it from next submission.

If you have further question, please feel free to let me know.

Thanks & Bet Regards,

Julia Chu
