Subject: Class II Change for Class B Computing Device Peripheral  
FCC ID: I88PRESTIGE310 / Broadband Internet Access Router

Gentlemen:

Enclosed, please find ZyXel Communications Corporation's application for equipment authorization dated March 19, 2000. The subject device was originally granted on August 3, 1999 in compliance with Part 15, Subpart B of the FCC Rules.

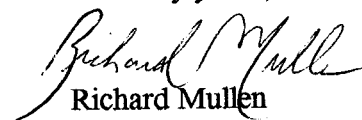

This device was previously reported as a broadband internet access router with 33.1776 MHz internal clock frequency that connects 10/100Mbps local area networks (LAN) and wide area networks (WAN) to the internet through host Cable or ADSL Modem. This device contains LAN and WAN interface jacks that operate at 20 and 25 MHz and RS-232 serial interface port to support System Management Terminal (SMT).

This Class II Change is to report: (1) replace multi-layer capacitors for SMD package; and (2) replace metal sheet image plane by metal foil. Refer to attached photographs on photo pages 6 and 7.

This EUT was network system tested while connected to host SMT computer and remote located Notebook Computers via LAN and WAN interface cables. Tests were performed in accordance with ANSI C63.4-1992 to show compliance to CISPR 22 Class B limits.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen  
Manager
