Dear Mike,

I check status of this case from the CCS web site. The status is "awaiting response". I'm not sure that the new report you have received or not. So I send the e-mail again. Any question please let me know. And if I need to wait a few days, please let me know, too. Thanks.

Best regards,

Joe Hsieh

Dear Mike,

Attached please find the new report.

Re-question #1: At the report page 8, note 5: "The radiation emissions have been measured to beyond the tenth harmonic of the fundamental frequency and show the significant frequencies, other means the value is too low to be detected." We add the result in the new report.

Re-question #2: Please sees the new report page 9. It's not a lot different during Channel 1 and Channel 2 of spurious emission below 1GHz.

Best regards

Joe Hsieh
