Re: LoJack KF-100

To Whom It May Concern:

The LoJack KF-100 was tested and found compliant with FCC CFR 47 part 15 subpart C, 15.231 paragraph (e), due to the fact that the device under test operates at a periodic rate exceeding that specified in paragraph (a) of CFR 47 part 15 subpart C section 15.231.

The original report data did not include the 50% duty cycle correction or 6dB deduction from the measured signal. We are including the corrected information and sending it as an attachment to the original report.

We apologize for any inconvenience, and look forward to working with you again in the near future.

Thank you,

Jeff Williams
