Subject: RE: IDILJU-03U CL2  
The sample was not working properly. It was resolved and here is the new report with appropriate power level data:

Please advise as to whether a permissive change is acceptable at the new power level.

Subject: Lo/Jack FCC ID: IDILJU-03U Permissive Change  
Danielle,

Review of this application is complete and the following points are noted:

ADMINISTRATIVE

1) No completed Form 731 has been filed with this application; please provide.

TECHNICAL

1) The output power shown in the test report is 24 dB lower than that in the prior filing for this device. Such a substantial change in output power does not qualify for a Permissive Change; see 2.1043(a). Please review and explain.

Certification can proceed as soon as these issues are resolved.

Thank you,  
Roland Gubisch
