Attention:

Application Examiner

Re: Request for confidentiality

Applicant: LoJack Corporation

FCC ID: IDIV7A

To whom it may concern,

Permanent Confidentiality

Request is hereby submitted by LoJack Corporation to withhold permanently from public review certain portions of the application for equipment certification for the referenced FCC identifiers. This request for confidentiality is made pursuant to 47 CFR 0.457(d) and 0.459 of the FCC Rules. In particular, the following sections of the application are to be kept permanently confidential:

- **Schematics**
- **Detailed Block diagrams**
- **Detailed Operational/Functional Description**
- **Tune up procedure**
- **Parts list**
- **Internal photos**

Our device is covertly installed by LoJack personnel. Release of photos could undermine the Vehicle Recovery Network by making out transponder easy to identify or to determine operating frequency in an attempt to jam the signals.

Rationale for request for confidentiality:

LoJack Corporation has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the permanently confidential portions of this application to competitors would not only give them significant competitive advantages in developing similar products, but would also disclose successful implementation of unpublished, leading edge technology developed by us. More so, restricting the knowledge of the receiver reduces the risk of intentional tampering with the product and/or use of the product in applications not sanctioned by LoJack Corporation. Finally, publication of the information could compromise the security of the Stolen Vehicle Recovery system that would not be in the public interest.

The fee for confidentiality has been submitted along with the fee for certification. If you have questions or need further information, please contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Robert M. White".

Robert M. White

Director Mechanical Engineering and Hardware Quality Assurance
LoJack Corporation
