Re: Permissive Change Request

Applicant: LoJack Corporation

FCC ID: IDIVLU-07

To whom it may concern,

FCC ID: IDIVLU-07

Request is hereby submitted by LoJack Corporation to make a permissive change to IDIVLU-07.

This request is made to allow LoJack Corporation to reduce the bandwidth of the IDIVLU-07. This reduction in bandwidth will allow LoJack to manufacture and ship one product that is certified in both US and Canada.

This reduction in bandwidth will be achieved similarly to all LoJack transponders by programming the unit with a different firmware file that will define the narrower bandwidth as required. This change is made at the time of manufacture and calibration.

Sincerely,

A handwritten signature in blue ink, appearing to read "Robert M. White".

Robert M. White

Director Mechanical Engineering and Hardware Quality Assurance

LoJack Corporation
