

Attention:

Application Examiner
Reviewing Engineer

Re: Request for confidentiality

Applicant: LoJack Corporation
FCC ID: IDIVTU3-US

To Whom It May Concern:

Request is hereby submitted by LoJack Corporation to withhold from public review certain portions of the application for equipment certification for the referenced FCC identifiers. This request for confidentiality is made pursuant to 47 CFR 0.457(d) of the FCC Rules.

In particular, the following sections of the application are to be kept confidential:

- Detailed operational/functional description
- Schematics
- Block diagrams

Rationale for request for confidentiality:

LoJack Corporation has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the confidential portions of this application to competitors would not only give them significant competitive advantages in developing similar products, but would also disclose successful implementation of unpublished, leading edge technology developed by us. More so, restricting the knowledge of the receiver reduces the risk of intentional tampering with the product and/or use of the product in applications not sanctioned by LoJack Corporation. Finally, publication of the information could compromise the security of the Stolen Vehicle Recovery system that would not be in the public interest.

If you have questions or need further information, please contact the undersigned.

Sincerely,

Sampath Krishna, Ph.D.
