

## **Exhibit 1: Identification Label -- Pursuant to 47 CFR 2.925 and 2.1033(c)(11)**

### **1.1 Location**

On the rear (back) side of the radio product chassis, beneath the battery (see also Exhibit 3).

### **1.2 Type**

The label is of a white polyester film laminate with a pressure sensitive adhesive backing. The adhesive is a permanent type acrylic with minimum peel strength of 5 lbs/in.

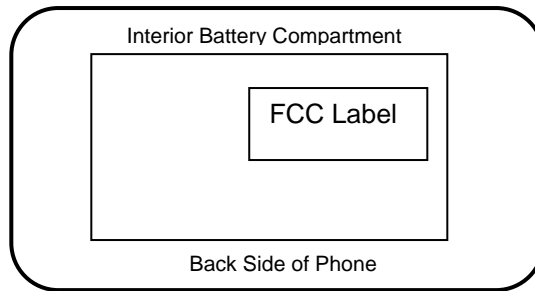

### **1.3 Markings (Text)**

The FCC label shown is representative of the label that will appear on the radio when in production.

**Figure 1.3.1. Representation of FCC Label information.**

This label will be placed on the equipment (within the Battery Compartment) as shown below. Other information may also be included on this label, and other labels may also be present.

**Figure 1.3.2. Location of FCC Label (position, orientation, and other information shown may vary).**

Please note that this label and its placement complies with the requirement of FCC Rule 47 CFR 2.925(d) that the label be permanently affixed to the product, and be readily visible to the purchaser at the time of purchase. Further, at the time of purchase, batteries are shipped in a separate section or compartment of the radio packaging, and are not attached to the radio. In some instances they may be shipped in separate boxes. So, the customer needs to physically install the battery by removing the battery cover, if any, or attach the battery before using the radio.

Further, the placement of the label in the battery compartment is done because space is limited on the exterior of the device. The battery compartment also helps to protect the label from getting obliterated or made unreadable through regular handling and use.

The product's Market or Trade Name is indelibly printed on the face of the product, as shown in Exhibit 3.

## **Exhibit 1A: General Information**

### **1A.1 Production Plans**

Quantity production is planned.

### **1A.2 Data Submittal Procedure**

Performance data located in Exhibit 6 are supplied in accordance with the Commission's rules: 47 CFR Part 2, Subpart J. The intended use of this transceiver includes applications covered in the Code of Federal Regulations Title 47, Part 15, Subparts A, B, and C; Part 24 Subparts B and D; and Part 90, Subparts I and S.

### **1A.3 Similar, currently Certified Transceiver**

FCC ID: IHDP56HS1

#### **1A.4 Additional Considerations**

This radio product integrates a receiver designed to process signals from Global Positioning System satellites, and is designed to function as a computer peripheral device when functioning as an RF modem, while connected to a computer via a data cable, as described in 47 CFR 15.3(r). For this reason a Declaration of Conformity has been prepared and provided as part of the User Guide (See Exhibit 8).

Compliance with Part 15 requirements for the Direct-Conversion (zero IF superheterodyne) receiver has been determined by verification in accordance with 47 CFR 15.1.
