

Exhibit 2. Statements of Certification -- Pursuant to 47 CFR 2.907

2.1. Specification Compliance

Transceiver type (IHDP56LU1) has been tested in accordance with the requirements contained in the appropriate Commission regulations. To the best of my knowledge, these tests were performed using measurement procedures consistent with industry or Commission standards and demonstrate that this equipment complies with the appropriate standards. Each unit manufactured imported or marketed, will conform to the sample tested within the variations that can be expected due to quantity production and testing on a statistical basis. I further certify that the necessary measurements were made at Motorola, 600 N. U.S. Highway 45, Libertyville, IL 60048.

2.2. Statement of Certification

I hereby certify that the above application was prepared under my direction and that to the best of my knowledge and belief, the facts set forth in this application and accompanying technical data are true and correct.

The technical data supplied with this application was taken under my supervision and is hereby duly certified. I also certify that this transmit equipment (IHDP56LU1) is in compliance with all applicable parts of the FCC Rules.

TITLE: Engineering Manager, Product Safety and Compliance

2.3. Attestation Statement (Equipment Class DTS and DSS - Bluetooth/Wi-Fi)

This device contains an embedded Bluetooth device, Wi-Fi device, and MOTOtalk capabilities that Motorola Mobility confirms are compliant with the applicable Part 15C regulations.

15.247(a)(1)

- The hopping sequence must be pseudorandom.
- All Channels are used equally on average.
- The receiver input bandwidth is approximately equal to the transmit bandwidth.
- The receiver hops in sequence with the transmitted signal.

15.247(g)

The system is designed to comply with all of the regulations in Section 15.247 when the transmitter is presented with a continuous data (or information).

15.247(h)

The system does not coordinate its channel selection/hopping sequence with other frequency hopping systems for the express purpose of avoiding the simultaneous occupancy of individual hopping frequencies by multiple transmitters.

2.4. Attestation Statement (Equipment Class NII - U-NII Wi-Fi)

This device contains an embedded U-NII Wi-Fi device that Motorola Mobility confirms to be compliant with the applicable Part 15E regulations.

15.407(c)

The device will automatically discontinue transmission in case of either the absence of information to transmit or operational failure. Details of how this is implemented can be found in Exhibit 12.

15.407(h)(1)

This device does not operate in the bands between 5.25 – 5.35 GHz and 5.47 – 5.725 GHz, and as such Transmit Power Control (TPC) is not required.

15.407(h)(2)

This device does not operate in the bands between 5.25 – 5.35 GHz and 5.47 – 5.725 GHz, and as such Radar Detection Function of Dynamic Frequency Selection (DFS) is not required.

2.5. Declaration of Available Operating Bands and Modes (Equipment Class PCE – CDMA 850/1900 MHz)

Motorola Mobility hereby declares that, while this product features GSM and WCDMA capabilities that operate within frequency bands regulated by the FCC, these modes are locked out for use within the territories of the United States. These modes have been disabled in the product's firmware, and are SIM locked by all US operators. This application, therefore, does not seek certification for these modes.
