Subject: Application for Class II Permissive Change to Certified transmitter with FCC ID: IHDP56LU1, CDMA 850/1900 Transceiver with Bluetooth & WLAN.

Gentlemen;

Motorola Inc., 600 North US Hwy 45, Libertyville, IL herein submits its application for a Class II Permissive Change to the certified multi-mode tablet with FCC ID: **IHDP56LU1**.

Note:

This device also contains functions, and operates within frequency bands, that are not authorized within the United States or its territories. This filing is only applicable to supported US operations.

Description of Changes:

The addition of a limited licensed modular device to add LTE (Band 13) has caused the maximum SAR value to increase, though the levels are still compliant. The module was approved separately as a limited modular approval under FCC ID IHDP56LU2.

Impact of Change:

The performance of all applicable and reportable operating parameters under FCC Rule Part 24E and Part 15C were evaluated and compared with the values originally filed. In particular, the RF Exposure performance (per 47 CFR 2.1093), was evaluated. The SAR measurements showed some degradation, though the levels remain compliant with FCC limits. All other aspects of the transmitter's performance remain unchanged, within measurement uncertainty, from that originally filed with the FCC for this ID

Conclusion:

This transceiver continues to meet all FCC requirements for which the original authorization was granted. The changes described, therefore, meet the requirements for a Class 2 Permissive Change, in accordance with 47 CFR 2.1043.

Enclosed are an amended test report, and Statements of Certification. Contact me at (847) 523-6167 if you require any additional information.
