

# **RF Exposure Evaluation Report**

**APPLICANT** : Motorola Inc.  
**EQUIPMENT** : S10-HD Universal Bluetooth Stereo Headphone  
**BRAND NAME** : Motorola  
**MODEL NAME** : S10-HD  
**FCC ID** : IHDP6LQ1  
**FILING TYPE** : Certification  
**STANDARD** : OET Bulletin 65 Supplement C (Edition 01-01)

We, SPORTON INTERNATIONAL INC., would like to declare that the tested sample has been evaluated in accordance with FCC OET Bulletin 65 Supplement C (Edition 01-01).

The test results in this report apply exclusively to the tested model / sample. Without written approval of SPORTON INTERNATIONAL INC., the test report shall not be reproduced except in full.

## Revision History

## **1. Introduction**

The report has been prepared on behalf of Motorola Inc. S10-HD Universal Bluetooth Stereo Headphone to show compliance with the RF Exposure.

### **➤ Requirements**

Three different categories of transmitters are defined by the FCC in OET Bulletin 65. These categories are fixed installation, mobile and portable and are defined as follows:

#### **▪ Fixed installation:**

Fixed location means that the device, including its antenna, is physically secured at a permanent location and is not able to be easily moved to another location. Additionally, distance to humans from the antenna is maintained to at least 2 meters.

#### **▪ Mobile Devices:**

A mobile device is defined as a transmitting device designed to be used in other than fixed locations and to be generally used in such a way that a separation distance of at least 20 centimeters is normally maintained between the transmitter's radiating structures and the body of the user or nearby persons. Transmitters designed to be used by consumers or workers that can be easily re-located, such as a wireless modem operating in a laptop computer, are considered mobile devices if they meet the 20 centimeter separation requirement. The FCC rules for evaluating mobile devices for RF compliance are found in 47 CFR 2.1091.

#### **▪ Portable Devices:**

A portable device is defined as a transmitting device designed to be used so that the radiating structure(s) of the device is/are within 20 centimeters of the body of the user. Portable device requirements are found in Section 2.1093 of the FCC's Rules (47 CFR 2.1093)

The FCC also categorizes the use of the device as based upon the user's awareness and ability to exercise control over his or her exposure. The two categories defined are Occupational/Controlled Exposure and General Population/Uncontrolled Exposure. These two categories are defined as follows:

**▪ Occupational/controlled Exposure:**

In general, occupational/controlled exposure limits are applicable to situations in which persons are exposed as a consequence of their employment, who have been made fully aware of the potential for exposure. Awareness of the potential for RF exposure in a workplace or similar environment can be provided through specific training as part of a RF safety program. If appropriate, warning signs and labels can also be used to establish such awareness by providing prominent information on the risk of potential exposure and instructions on methods to minimize such exposure risks.

**▪ General Population/Uncontrolled Exposure:**

The general population / uncontrolled exposure limits are applicable to situations in which the general public may be exposed or in which persons who are exposed as a consequence of their employment may not be made fully aware of the potential for exposure or cannot exercise control over their exposure. Members of the general public would come under this category when exposure is not employment-related; for example, in the case of a wireless transmitter that exposes persons in its vicinity. Warning labels placed on low-power consumer devices such as cellular telephones are not considered sufficient to allow the device to be considered under the occupational/controlled category, and the general population/uncontrolled exposure limits apply to these devices.

Since there are no warnings or training associated with this unit and it can be used by anyone, S10-HD Universal Bluetooth Stereo Headphone is evaluated to the General Population / Uncontrolled Exposure limits.

## **2. Administration Data**

### **2.1 Testing Laboratory**

<b>Test Site</b>	SPORTON INTERNATIONAL INC.
<b>Test Site Location</b>	No. 52, Hwa Ya 1 <sup>st</sup> Rd., Hwa Ya Technology Park, Kwei-Shan Hsiang, Tao Yuan Hsien, Taiwan, R.O.C. TEL: +886-3-327-3456 FAX: +886-3-328-4978

### **2.2 Applicant**

<b>Company Name</b>	Motorola Inc.
<b>Address</b>	No. 600 N.U.S. Highway 45, Libertyville, IL 60048 USA

### **2.3 Manufacturer**

<b>Company Name</b>	Merry Electronics (Shenzhen) CO., LTD.
<b>Address</b>	No. 50, MeiBao Road, Dalang Street, BaoAn District, Shenzhen City, GuangDong Province, China

### **3. General Information**

#### **3.1 Description of Device Under Test (DUT)**

Product Feature & Specification	
<b>DUT Type</b>	S10-HD Universal Bluetooth Stereo Headphone
<b>Brand Name</b>	Motorola
<b>Model Name</b>	S10-HD
<b>FCC ID</b>	IHDP6LQ1
<b>Tx Frequency</b>	2400 MHz ~ 2483.5 MHz
<b>Rx Frequency</b>	2400 MHz ~ 2483.5 MHz
<b>Antenna Type</b>	PIFA Antenna
<b>HW Version</b>	BHC715-RF-0707
<b>SW Version</b>	BHC715-Ver. F
<b>Type of Modulation</b>	Bluetooth (1Mbps) : GFSK Bluetooth EDR (2Mbps) : $\pi/4$ -DQPSK Bluetooth EDR (3Mbps) : 8-DPSK
<b>DUT Stage</b>	Production Unit

## **4. RF Exposure Evaluation**

### **4.1 Radio Frequency Radiation Exposure Evaluation**

For this device, the calculation is as follows:

- No evaluation required if power is below this power threshold:

Frequency (GHz)	Power (mW)	Power (dBm)
2.48	24.19	13.84

Maximum measured transmitter power for the EUT:

Power (dBm)
3.85

Threshold for no RF exposure evaluation is 13.84 dBm.

Transmitter power of this device is 3.85 dBm.

**Conclusion:** No RF exposure evaluation required since transmitter output power is below the power threshold.
