

MOTOROLA

Date: December 4, 2003

Subject: Request for additional information (FCC ID: IHDT56DC1)

Reference:

Application received:	12/2/2003
Correspondence Reference Number:	231203A.IHD
Confirmation Number:	TC3305
Date of Original Email:	12/3/2003

Prepared by:

Andrew Bachler, Principal Staff Engineer
Motorola Personal Communications Sector
Libertyville, Illinois

Questions and responses follow:

1. Please submit the required z-axis plot for each measured frequency band - they were omitted in the SAR test report.
2. Please provide photos of the new batteries.
3. Will these new batteries ever be sold separately? The SAR test report states that the PTT function has been disabled by software in this version of the EUT (and as a result was not tested), however, if the batteries will ever be sold separately, then they might be used with the original version that incorporates the PTT function. If this is the case, then the new batteries should also be tested in the PTT mode.

Response: Please refer to the supplemental SAR report.
