Product Equality Declaration

We, Motorola Mobility LLC. declare on our sole responsibility for the product as below:

The differences between **Latam (10807, 11154)**, **Brazil (10809)**, **EMEA (10811, 10646)**, **APAC (10808)**, **and India (10812)** as below:

■ HW section

- One more SPDT is applied in PRX chain of Latam SKU, which is used for B1 & B4 co-existence. B1 & B4 share the same PRX port of WTR. Because there is no B4 in EMEA & APAC & India & Brazil SKUs, the SPDT can be saved.
- One more SP2T is applied in DRX chain of EMEA & APAC SKU, which is used for B7 & B38 co-existence. B7 & B38 share the same DRX port of WTR .Because there is no B38 in Latam & India & Brazil SKUs, the SP2T can be saved.
- One more SPDT is applied in PRX chain of EMEA & APAC SKU, which is used for B38 & B40 co-existence . B38 & B40 share the same PRX port of WTR .When there is no B38 in India & Brazil & Latam SKUs, the SPDT can be saved.
- One more SPDT is applied in DRX chain of EMEA & APAC & Latam SKUs, which is used for B20/B28 co-existence or B12(17)/B28 co-existence. B12(17)/B20 & B28 share the same DRX port of WTR .Because there is no B20/B12(17) in Brazil & India SKUs ,the SPDT can be saved.
- APAC SKU use different duplex and saw filter for band 26/5/18/19 Tx, WCDMA 5/19 TX , band 26/5/18/19 , WCDMA 5/19 RX,GSM850 Rx. EMEA & Latam & Brazil & India use another duplex and saw filter
- RF trace: same across Latam, Brazil, India, EMEA, APAC SKUs.
- PCB layout: same across Latam, Brazil, India, EMEA, APAC SKUs.
- PCBA: for any DS/SS models under the same SKU the same PCBA will be used. For example, EMEA DS/SS will share the same PCBA and the only difference is that SS model will have only one SIM slot.

PCBA of each SKU is unique because the RF components will differ from SKU to SKU.

- WLAN/BT antenna type, antenna pattern, antenna location and chipset: Same across Latam, Brazil, India, EMEA APAC SKUs.
- Latam, Brazil, India, EMEA, APAC SKUs have the same primary antenna and the same diversity, GPS antenna.
- NFC antenna type, antenna pattern, antenna location and chipset: Same across EMEA, APAC.

LATAM, INDIA, BRAZIL SKU does not support NFC.

■ SW section

For this particular Motorola project all SKUs will be sharing the same SW version. The main differences exist per SKUs are related to RF Bands supported, Regarding the SW/FW, there is NOT much difference between SKUs. Note that specific features are enabled via MCFG depending on SIM Card inserted to device, as the lab tests are usually performed with a base FSG setup, we should not expect differences on the protocol level between all SKUs.

■ Mechanical section

There is no difference in mechanical design and materials used for all SKUs of Montana. There are differences in terms of memory configuration\ key components and number of SIM's supported across different SKUs as see the list.
