### **Location: JAPAN. This section is online/on-device for all regions. It's a print requirement for Japan only.**

**Location services.** Your phone can provide information about approximate location to applications, using sources including GPS, AGPS, and Wi-Fi. GPS (Global Positioning System) uses government-operated satellites that are subject to changes implemented in accordance with Department of Defense policy and the Federal Radio Navigation Plan. These changes may affect the performance of location technology on your phone. AGPS (Assisted Global Positioning System) uses your wireless service provider's network to improve GPS performance. Airtime, data fees, and/or additional charges may apply in accordance with your service plan. Contact your wireless service provider for details. Your phone can also use Wi-Fi signals to determine your approximate location, using information from known and available Wi-Fi networks.

Phones transmit location-based information when connected to a wireless network or when using other location technologies like GPS. If you use applications that require location-based information such as driving directions, your phone will provide location information to them. These applications may share location information with third parties, including your wireless service provider, applications providers, Motorola, Lenovo, and other third parties providing services.

**Emergency calls:** When you make an emergency call, the cellular network may activate the AGPS technology in your phone to tell the emergency responders your approximate location. AGPS has limitations and may not work in your area. Therefore,

- Always tell the emergency responder your location to the best

- of your ability; and
- Remain on the call for as long as the emergency responder instructs you.

### **Security: JAPAN. This section is online/on-device for all regions. It's a print requirement for Japan only.**

- Secure personal information. Your phone can store personal information in various locations, including a SIM card, memory card, and phone memory. Be sure to remove or clear all personal information before you recycle, return, or give away your phone. You can also backup your personal data to transfer to a new phone.

### **User Privacy: JAPAN, MEA. A version of this section is online/on-device for all regions. It's a print requirement for Japan and MEA only.**

**User privacy.** Motorola and Lenovo are committed to protecting and appropriately using personal data and user information under our care. Please also be sure to take advantage of the privacy and security controls and features within your phone.

In addition, please note that when your Motorola product is turned on for the first time (and is connected to the internet), the international mobile station equipment identity (IMEI) number or serial number (SN) of this product, together with the information about the country and city where this product is first activated will be registered with Motorola and/or Lenovo; this will be a one-time registration.
