

OPTIONAL iJET ACCESSORIES continued:

iPOD Stand:

This dual function stand is the perfect option for your iPod because it is both fully functional and decorative. It props the iPod upright on your stereo system, television or wherever you choose to place it making viewing of the LCD screen easy as well as keeping the iJET upright for maximum reception of the remote. The top section can be removed if you are not using the iPod charger or place it in the base to hide the charger plug, ear buds or any other small iPod accessory.

Part Number iJET-Stand.

CONGRATULATIONS ON YOUR PURCHASE OF THE iJET WIRELESS RF REMOTE CONTROL

The iJET was designed to provide maximum control of your iPod from anywhere you choose to place it regardless of whether it is in your backpack at school or hundreds of feet away in a different room connected to your home stereo.

OPERATION:

Plug the iJET into the top of your iPod and WAIT 30 seconds. A self diagnostic will automatically run and your wireless remote will be ready for operation within 30 seconds. Plug in your ear buds, speakers or connect to your home stereo through a set of RCA jacks (supplied in some iJET kits). The connection of ear buds, RCA jacks or stereo wire is imperative for optimum performance since the iJET uses this plugged in wire as an antenna (Patent Pending) for maximum range.

CONGRATULATIONS ON YOUR PURCHASE OF THE iJET WIRELESS RF REMOTE CONTROL

The iJET was designed to provide maximum control of your iPod from anywhere you choose to place it regardless of whether it is in your backpack at school or hundreds of feet away in a different room connected to your home stereo.

We are a one way device. Our self diagnostic is internal, and we can only send commands to the iPod. This is done via a Open Collector bus with a baud rate of 19.2K.

OPERATION:

Plug the iJET into the top of your iPod and WAIT 30 seconds. A self diagnostic will automatically run and your wireless remote will be ready for operation within 30 seconds. Plug in your ear buds, speakers or connect to your home stereo through a set of RCA jacks (supplied in some iJET kits). The connection of ear buds, RCA jacks or stereo wire is imperative for optimum performance since the iJET uses this plugged in wire as an antenna (Patent Pending) for maximum range.

OPERATION continued:

REWIND:

Press and release this button to move track BACKWARDS. Press and HOLD this button to rewind through the track

VOLUME DOWN:

Press and HOLD this button to scroll volume down

PAUSE/PLAY/SLEEP:

Press and release to toggle between Pause and Play.* Press and HOLD for 2 full seconds to put the iPod into sleep mode. *If you press and hold this button for longer than 1 second but less than 2 seconds the iJET will ignore your request.

ADVANCED LOW POWER MODE (ALPM):

The iJET uses an advanced power down mode which minimizes current draw on your iPod battery if you are not connected to a constant power source. After 20 minutes of sensing no music playing or no remote commands being sent, the iJET goes into an advanced battery save mode. The iJET receiver will automatically re-power itself when it detects music playing (if there was none before) or it sees a remote button being pressed for more than .6 seconds.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions.

- 1)•This device may not cause harmful interference, and
- 2)•This device must accept any interference received, including interference that may cause undesired operation.
