Mr. Andy Leimer
Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

Dear Mr. Leimer:

We have reviewed the Technisonic Industries Limited letter dated Nov. 07, 2013 regarding a request for Federal Communications Commission (FCC) certification of the very high frequency (VHF) Communications Transceiver, FCC ID: IMA-T3400, which operates in the VHF band 118-137 MHz band. The request is to certify the equipment for 25 kHz spacing to operate within the United States National Airspace System (NAS). Additional capabilities include 8.33 MHz channel spacing.

The Spectrum Engineering Group has reviewed the information presented by Technisonic Industries Limited and has found no objection to the FCC granting certification to the FCC-ID: IMA-T3400, VHF Transceiver *providing that operations in the 8.33 MHz mode not be exercised within the NAS*. The equipment will be operated under FCC Part 87 rules.

If you require any additional information, please contact Ms. Annette Allender, Electronics Engineer, Spectrum Planning and International Group, at (202) 267-3893.

Sincerely,

Robert A. Frazier
Manager, Spectrum Planning
and International Group
