Dear Sir/Madam,

Technisonic understands the following Part 90 VHF spectrum and would like the FCC to certify the entire 117.975-138 MHz spectrum to include the part 90 extended frequencies. This would be done to facilitate the requirements of agencies covered under NTIA spectrum usage. Government agencies complying with the NTIA instead of the FCC must purchase their equipment from private industry manufacturers who are governed by FCC rules. The conflict in spectrum allocation detracts from the options available to government agencies for commercial off the shelf equipment which meets their required specifications.

Part 90 extended frequencies:

137-138 MHz Part 25

Regards

Steve McIntosh
