Dear Sir/Madam,

Technisonic understands the following Part 90 VHF spectrum and would like the FCC to certify the entire 136-174MHz spectrum to include the part 90 extended frequencies. This would be done to facilitate the requirements of agencies covered under NTIA spectrum usage. Government agencies complying with the NTIA instead of the FCC must purchase their equipment from private industry manufacturers who are governed by FCC rules. The conflict in spectrum allocation detracts from the options available to government agencies for commercial off the shelf equipment which meets their required specifications such as the requirements stated in the Department of the Interior's Narrowband digital radio contract.

Part 90 extended frequencies:

136-137 MHz Part 87  
137-138 MHz Part 25  
144-148 MHz Part 97  
148-150.05 MHz Part 25  
156.2475-157.0375 MHz Part 87  
161.575-161.625 MHz Part 22 and 80  
161.625-161.775 Part 22 and 74

Part 90 Mobile and Land Mobile frequency bands:

406.1-410.0MHz  
410.0-420.0MHz  
450.0-454.0MHz  
456.0-460.0MHz  
460.0-462.5375MHz  
462.7375-467.5375MHz  
467.7375-470.0MHz  
470.0-512.0MHz

We understand that it is a violation of FCC rules if the device operates on unauthorized frequencies.

Regards
