Re: Questions on application, Correspondence Ref. Number 24823

Nieuwegein, 20 February 2003

Dear Sir/Madam,

Reaction/answers to the questions:

1. The 4 antenna listed in the application letter are all external to the PC Card and external to a Personal Computer. Attached is a table with information on model number, type, manufacturer and gain (FCC List antennae 1.xls)  
Also attached is document with photos of the antennae (Photos of external antennae 1.doc).  
Also please be aware that when the external antenna is connected the integral antennal is automatically disconnected and thus these antennae cannot transmit at the same time.
2. Updated user manual/flyer has already been forwarded to ATCB but I have attached it again (REGFlyerGMV.pdf). Original flyer already has the RF statement to cover the extension with the antennae in this request.
3. New MPE estimation analysis is attached (RFExpIMRPC2411B\_MPE\_1.doc)
