RF exposure analysis for the equipment G5 (FCC ID: INWU9)

The output power of the device is extremely low (83.88 dB μ V/m @ 3m, equivalent to 0.07 mW eirp) and far below the $60/f(\text{GHz})$ mW ($60/2.45$ mW = 24.48 mW) threshold. For that reason the equipment is categorically excluded from routine environmental evaluation for RF exposure and it is deemed to comply with FCC limits for exposure to electromagnetic fields.
