RF exposure analysis for the equipment Polar LOOK Kéo Power (FCC ID: INWV3; IC: 6248A-V3)

The output power of the device is extremely low (89.80 dBuV/m at 3 m, equivalent to 0,28 mW) and far below the $60/f(\text{GHz})$ mW ($60/2.45$ mW = 24.48 mW) threshold. For that reason the equipment is categorically excluded from routine environmental evaluation for RF exposure and it is deemed to comply with FCC limits for exposure to electromagnetic fields.
