Subject: Modification to the EUT

Gentlemen:

To successfully meet the radiated emission requirement of FCC Part 15.209 and FCC Subpart B, it was necessary to do the following:

1. Add a surface mount ferrite (Associated Components Technology P/N: HCB-805) in series to Antenna connection L2A.
2. Add a surface mount ferrite (Associated Components Technology P/N: LCB-1206) in series to Antenna connection L2B.

This exact modification will be implemented and incorporated into our schematics and printed circuit board layout and will be contained in production devices when the product is released.

If you have any questions, please do not hesitate to contact us at (909) 371-7505.

Sincerely,

Michael F Cruz  
Director of Engineering
