Equipment Authorization Division

**RE: Request for Confidentiality, FCC ID IP9ECHO-TX9A**

This letter is a request to hold the following documents pertaining to the application for FCC Type Certification for IP9ECHO-TX9A as confidential and to withhold them from public disclosure.

This request is concurrent with the FCC rules (section 0.457(d) and section 0.459) and the Freedom of Information Act (section 0.552(b)(4)).

The documents are:

- 1.) All schematic diagrams
- 2.) All circuit descriptions
- 3.) All parts lists
- 4.) All circuit block diagrams
- 5.) All internal photographs

Public disclosure of these pieces of design information would put Tactical Technologies Inc. at a substantial disadvantage competitively. Tactical Technologies Inc. does not make the above information available to the general public.

Thank you very much for your attention to this.

Sincerely,

Jeffrey Olsen  
Engineer

Tactical Technologies Inc
