RE: FCC ID: IPH-02438/ IC: 1792A-02438 limited singular module transmitter:

To whom it may concern,

The purpose of this letter is to address the limited singular module transmitter in order to obtain a limited singular module certification:

- (1.) The radio elements of the limited singular module transmitter have their own shielding via the main integrated circuit chip used.
- (2.) The limited singular module transmitter has buffered modulation/data inputs to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation via the operation of the main integrated circuit chip used.
- (3.) The limited singular module transmitter has its own power supply regulation, which is fully regulated.
- (4.) The limited singular module transmitter complies with the antenna and transmission system requirements of §§15.203, 15.204(b) and 15.204(c). The antenna is a built-in PIFA type antenna which is permanently attached.
- (5.) The limited singular module transmitter was tested in a stand-alone configuration.
- (6.) The limited singular module transmitter is equipped with a permanently affixed label
- (7.) The limited singular module transmitter complies with any specific rules or operating requirements that ordinarily apply to a complete transmitter. Garmin International intends to use the transmitter for internal purposes only. Documentation will be created for uses within Garmin.
- (8.) The limited singular module transmitter will comply with any applicable RF exposure requirements in its final configuration.

Sincerely,

A handwritten signature in blue ink, appearing to read "Van Ruggles", written over a horizontal line.

Van Ruggles
Director, Quality Assurance & Certification
