

CB-7.2.1 – Technical Review RT Form

FCC ID: IPH-02670

IC ID: 1792A-02670

CT Project: P1530009

From: Shawn McMillen

Date: 06-09-2015

1--The CB-731 form for this application is for another client.

DW: Correct one in file.

2--The bill of materials wasn't included with the long term confidentiality. Is this correct or just an oversight?

Client: 6/15/15 - Revised letter provided.

3--The receiver portion of this device does not need to be included with this application as is it not being certified as a system. The theory of operation for the Sport ProDD and the internal/external photos of the receiver can be excluded.

DW: Removed.

4--In the EMC report the modulation for F1E appears to have a typo. Should read 8K30F1E.

Alex: Updated test report

5--Three modulations are described in the report as being applicable to this device however only one modulation was applied to the emission mask.

Alex: Updated test report

SM: Please indicate what has been done to the report. There appears to be no changes made.

Alex: The test report now describes only one modulation type. This is indicated by the revision table on page 2 of the test report.
