SUBJECT: FCC Application for IPH-03069

To Whom It May Concern:

Regarding FCC ID label placement for this application, Garmin wishes to place the label inside the battery compartment due to size, aesthetics, and durability. This device is small and typically carried inside vest or pocket. The equipment is sold without the battery installed, offering the end user the opportunity to view the label before operation. The identifier label will be readily viewable each time the battery is removed, or replaced. This location will help ensure the longevity of the label as this equipment may be in service in harsh environments.

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Kealey", is written over the printed name.
