## NFC Antenna Change Letter

Date: 02-07-2024

Federal Communications Commission

Authorization and Evaluation Division

7435 Oakland Mills Road

Columbia, MD 21046

USA

To Whom it may Concern:

For the product with IPH-04724, MN: A04724, The NFC Antenna is being changed from a flex wire frame to an SMD antenna. This change requires the PCB to be re-designed for the NFC portion, we have attached an exhibit to show side by side comparison of the PCB changes from Old to New in the next page of this document. No other circuitry from the earlier grant has touched or changed.

The confidential submission includes the side-by-side comparison of the old vs new.

The new PCB has been re-evaluated for the Standards: **CFR 47, FCC Part 15, Subpart B, ICES-003 Issue 7, CFR 47, FCC Part 15.225 , RSS-210 Issue 10 Amd 1**

The test reports from the re-evaluation are submitted for this approval application.

This change has been made to improve the manufacturing process and for cost reduction.
