### Summary of Changes Requiring Class II Permissive Change

To Whom It May Concern:

A Class II Permissive Change is requested for this product because the 2.4 GHz antenna was redesigned to provide higher EIRP for Bluetooth and ANT+ transmissions. This product also transmits WiFi at 2.4 GHz using the same antenna, and the WiFi power has been reduced so the WiFi EIRP remains the same. The WiFi transmit power is higher than both Bluetooth and ANT+ transmit powers, so maximum EIRP is unchanged.

Thank you for your consideration in this matter.
