RE: Garmin International, Inc.

FCC ID: IPH-A3556

IC: 1792A-A3556

ATCB024216

The EUT connects to a pc via USB, making it a pc peripheral subject to either SDoC or Certification. Please indicate which method of authorization will be used for the pc peripheral portion of the EUT. **EUT/PC peripheral will be authorized under SDoC.**

The User's Manual (with filename "AA3556 Manual OM") describes an optional carabiner clip accessory on p.20/26. This accessory was not tested for SAR - please clarify if it contains any metallic components or not. The presence of metallic material in the clip would necessitate that it be tested for body-worn SAR - please address.

**The carabiner clip will be tested and covered under a C2PC**
