Re: Changing FCC Identifier for IPH-A2401

To Whom It May Concern:

Per Part 2.933 of CFR Title 47, Garmin International, Inc. respectfully requests to modify the identification number for a new version of IPH-A2401 to be identified as IPH-B2401.

The original grant date for IPH-A2401 is October 17, 2016.

The equipment bearing the modified identification (IPH-B2401) differs from the original equipment in the following way:

- 8GB NAND memory in place of 4GB NAND, drawing the same current, in the GPS circuitry
- updated compass and barometer sensors (electrically equivalent, replaced because of obsolescence)

No changes to any transmitters were made. The updated product has been verified to show no changes in any transmissions. These changes will be implemented after the identifier IPH-B2401 is in place, and a Class I Permissive Change will be applied to the new version of the product.

The original test results continue to be representative of and applicable to the equipment bearing the changed identification. External photographs of the new equipment have been provided.

Thank you for your attention to this matter.

Sincerely,

A handwritten signature in black ink that reads "William H. Pertner".

William H. Pertner
Lead Compliance Engineer
