Module Integration Attestation

Module:

FCC ID: IPH-03302
IC: 1782A-03302

The module must only be installed in the host device specified below:

Host:

FCC ID: IPH-A4624
Model/HVIN: AA4624
IC: 1782A-A4624

This application is for a limited modular approval that is limited to one host only. In addition, the module integrator must be the manufacturer of both the host and the module. The trace specifics and markings will always be locked down as part of the host design and it would therefore always ensure that the reference trace is followed and compliance is achieved.

The module covered under this Class II permissive change will never be supplied to third parties. Integration will always be under full control of the module manufacturer. It is acknowledged that any changes to the host device may require an additional class II permissive change application.

A handwritten signature in black ink, appearing to read "C. Strauss".

Chris Strauss
