

Conditions from Section 9 of WT Docket No. 20-115

- (1) Garmin must ensure that the part 25 component of its combination part 95 MURS/part 25 satellite handheld device is a provisioned service that requires each end user to first obtain authorization before accessing the satellite service.

Page 3 of the user's manual that is provided with each device instructs the user to create an account and activate the device. Through the activation process, the user obtains authorization.

- (2) Garmin must include a printed disclosure with its combination part 95 MURS/part 25 satellite handheld device indicating that the part 25 transmission capability of the device is provided by a third-party service provider and must be activated through affirmative action by the consumer.

Page 3 of the user's manual that is provided with the device states that the device communicates with the Iridium satellite network, which is a third-party service. This is also states on Pages 7 - 9 under the "InReach services"

Page 3 of the manual states that Iridium is a trademark of Iridium Satellite LLC, which identifies a third party.

Activating the Device

Before you can use the inReach features of your Alpha device, you must activate it.

- 1 Create an account, and select a satellite subscription at explore.garmin.com.
- 2 Turn on the device.
- 3 Select **Activate**.
- 4 Follow the on-screen instructions.
NOTE: You must enter the device IMEI number and authorization code to complete the online portion of activation before you go outdoors.
- 5 Go outdoors to an open area with a clear view of the sky, and point the antenna on the device toward the sky for optimal performance.
- 6 Wait while the device communicates with the Iridium satellite network.

NOTE: It may take up to 20 minutes to activate your device. The device must send and receive several messages, which takes longer than sending a single message during regular use. You should remain outdoors until activation completes.
