

### **Section 3.        RF Power Output**

<b>Test Performed By:</b> Russell Grant	<b>Date of Test:</b> September 20, 2000
---	---

**Minimum Standard:**        Para. No. 22.913(a).

**Test Results:**        Complies. The maximum RF output power is within  $\pm 1$ dB of the manufacturer's rating. The RF output power is de-rated according to the number of channels via AGC and is equal to  $P_{max} - 10 \log N$ ,

$P_{max}$  = Maximum RF output power

$N$  = Number of channels
