McLean, VA22101

FCC ID : IXMCF114100

The following information is a list of modifications that will be included in the production process for the above-referenced equipment.

**\*The power value set in the firmware will be reduced - Field "Tx Power" at the firmware will be set from "8B" to "79".**

The EUT tested before is not carried into mass production stage and the power of our final products will be tuned as the value attested above.

I sign below and assure that all these changes will be done before the product selling to the public. Also assure that the spurious emissions (not just the fundamental) have been checked and that the readings are less than or equal to the previous readings before such modification.

Thank you for your favorable considerations upon this statement.
